

Manuel Esteban Erazo Medina

Popayán, Colombia · Remote available · [linkedin.com/in/manuekle](https://www.linkedin.com/in/manuekle) · github.com/manuekle · meerazo7@hotmail.com

Full-Stack Developer with a founder mindset. I build complete products — from idea to production — using a modern stack based on Next.js, TypeScript, and Node.js, with active AI integration (OpenAI, Anthropic, Mistral, MCP). I founded GymRat+, a SaaS for gym management, while studying Systems Engineering. I'm looking for teams with real vision where I can build, iterate fast, and generate impact.

PROFESSIONAL EXPERIENCE

GymRat+

2024 – Present

CEO & Founder — Gym Management SaaS

- Designed and developed a fully functional SaaS for gym management from scratch, owning the full-stack architecture, product strategy, and business vision.
- Implemented payment integration with MercadoPago, secure authentication, admin dashboard, and full membership management system.
- Responsible for the complete product lifecycle: ideation, design, development, deployment, and ongoing support.

Smurfit Kappa Cartón Colombia

2025

Web Developer

- Developed enterprise web solutions for internal technology projects within the company.
- Contributed improvements to existing systems using a modern stack and software development best practices.

Mistral Worldwide Hackathon

February 2026

Participant — Mistral AI × Weights & Biases × NVIDIA

- Built generative AI solutions in a high-level global competitive environment.
- Collaborated under pressure using cutting-edge AI ecosystem technologies.

Freelance Web Developer

2023 – Present

Full-Stack · Independent Projects

- Developed modern web applications for clients across different industries, focusing on quality and fast delivery.
- Implemented complete frontend and backend solutions using Next.js, React, Node.js, and SQL/NoSQL databases.

PROJECTS

GymRat+

2024 – Present

Comprehensive gym management SaaS. Full-stack with Next.js, PostgreSQL/Prisma, authentication, MercadoPago payments, and admin dashboard.

heyMed

2025

Medical management platform with AI integration. Automation of clinical workflows, patient records, and intelligent assistance for healthcare professionals.

ButterflyAR

2024

Augmented reality project exploring AR technologies applied to web applications.

QR Attendance

2023

QR code-based attendance tracking system. Node.js backend with real-time registration and query.

EDUCATION

TECHNICAL SKILLS

Frontend: React · Next.js · Astro · TypeScript · JavaScript · Tailwind CSS · Flutter · Motion

Backend: Node.js · Python · Bun

Databases: PostgreSQL · MySQL · MongoDB · Prisma ORM

AI & LLMs: OpenAI · Anthropic · Mistral · Gemini · Kimi · Ollama · MCP (Model Context Protocol) · n8n

Tools: Git · Docker · Vercel · Google Cloud Platform · Redis · Figma · Postman · MercadoPago · Meta Ads
