PROFILE

Full-Stack & AI Developer with a founder mindset and a passion for building simple, fast, well-designed web experiences. I take products from idea to production with Next.js, TypeScript, and Node.js, integrating language models (OpenAI, Anthropic, Mistral, MCP) into real-world workflows. Founder of GymRat+, a multi-tenant SaaS for gym management, with experience across international hackathons, frontend engineering, and cybersecurity. Currently focused on frontend development and user-centered product design. Available for remote and on-site work in Bogotá.

EXPERIENCE

Founder & Full-Stack Developer · GymRat+

2024 – Present

Gym Management SaaS · Bogotá, Colombia (remote)

- Founded and built a multi-tenant SaaS for gym management from scratch, owning the full-stack architecture, product strategy, and business vision.
- Implemented multi-tenant billing, MercadoPago payments, authentication, end-to-end onboarding, and a complete admin dashboard.
- **Stack:** Next.js, TypeScript, Node.js, PostgreSQL, Prisma.

Mobile & Web Developer · Smurfit Kappa Cartón Colombia

Aug – Nov 2025

Colombia (remote)

- Developed an augmented-reality mobile app for an educational butterfly book, delivering an interactive learning experience.
- Built internal tools, reporting dashboards, and enterprise web solutions, modernizing existing systems with current development best practices.

Software Engineer · Gymshark

Apr – Oct 2025

Internship · Remote (San Francisco Bay Area)

- Contributed to web applications focused on performance, scalability, and user experience, working alongside cross-functional teams.
- Designed, implemented, and optimized features for products used by thousands of users worldwide, applying solid development and version-control practices.

Full-Stack Developer · Freelance

2023 – Present

Independent projects for clients in LATAM and the EU

- Delivered 12+ projects across different industries, prioritizing quality and fast turnaround.
- Built complete frontend and backend solutions with Next.js, React, Node.js, and SQL/NoSQL databases.

Software Developer · Servicio Nacional de Aprendizaje (SENA)

Mar 2021 – Nov 2022

Colombia (remote)

- Collaborated within a development team to build and maintain an internal digital system for the institution, contributing to backend logic and administrative features.

HACKATHONS & COMPETITIONS

Claude Code Hackathon 2026 · Anthropic — Top 20

April 2026

- Built an autonomous code agent in 48 hours in a global competition, finishing in the Top 20.
- Implemented multi-step reasoning and autonomous task execution using Claude Code.

Mistral Worldwide Hackathon

February 2026

Mistral AI × Weights & Biases × NVIDIA

- Built a multi-agent pipeline with Mistral models in a high-level competitive global environment, collaborating under pressure with cutting-edge generative AI.
- Microsoft AI Agents Hackathon

2026

 - Built Forge on Azure AI Foundry — six AI agents that debate, vote, and generate PRDs, backlogs, architecture, and roadmaps.

Hackathon Challenge 2025 · Fundación Universitaria de Popayán

2025

 - Developed an inventory and sales-analysis solution for the university's internal competition.

SELECTED PROJECTS

- **creagent** — Open-source platform for composing AI agents from a catalog of reusable skills; exports to Claude Code, Cursor, Codex, Gemini CLI, or serves agents directly via MCP. creagent.fun (2026)
- **steve** — AI-powered customer service platform unifying WhatsApp, Instagram, and Meta Ads into one inbox; AI agents answer from uploaded knowledge bases, book appointments, and process payments (Stripe, MercadoPago). Next.js, PostgreSQL, Docker. steve-manudev.vercel.app (2026)
- **forge** — Multi-agent product-strategy tool on Azure AI Foundry: six AI agents debate, vote, and generate PRDs, backlogs, architecture, and roadmaps. forgems.vercel.app (2026)
- **GymRat+** — Multi-tenant SaaS for comprehensive gym management. Next.js, PostgreSQL/Prisma, billing, MercadoPago, onboarding, and admin dashboard. gymratplus.com (2024 – Present)
- **SIRA** — QR-based attendance registration system for Fundación Universitaria de Popayán; Node.js backend with real-time queries. sira-fup.online (2024)
- **heyMed** — Virtual medical-consultation platform with AI integration, clinical workflow automation, and patient records. heymed-manudev.vercel.app (2023)
- **hinomaru** — Japanese-learning app with kana, vocabulary, and spaced repetition. hinomaru.vercel.app (2024)
- **ButterflyAR** — Educational augmented-reality app about butterflies. (2023)

EDUCATION

Fundación Universitaria de Popayán

2021 – 2026

B.Sc. Systems Engineering (Computer Software Engineering)

CERTIFICATIONS

- Building with the Claude API — Anthropic
- Agents League - Reasoning Agents — Global AI Community
- Project Management Fundamentals — Initiation & Planning — Coursera / SkillUp EdTech
- Effective Problem-Solving & Decision-Making — University of California, Irvine
- Google UX Design Specialization — Coursera / Google

TECHNICAL SKILLS

Frontend: React, Next.js, Astro, TypeScript, JavaScript, Tailwind CSS, Flutter, Framer Motion

Backend: Node.js, Python, Bun, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM

AI & LLMs: OpenAI, Anthropic (Claude), Mistral, Gemini, Kimi, Ollama, MCP (Model Context Protocol)

DevOps & Infrastructure: Docker, Linux, Git, Vercel, Google Cloud Platform

Design & UX: Figma, UI/UX design, design systems, responsive design

Cybersecurity: Network auditing, vulnerability analysis, web security

Tools: Postman, MercadoPago, Meta Ads
